Elite Pipettes and SureOne™ Tips

Fisherbrand[®] Elite Pipette and SureOne[™] Pipet Tips

This pipetting system provides a complete line of pipettes and tips with optimal fit. Take a look at the benefits that make the Fisherbrand[™] Elite[™] Pipette and Fisherbrand[™] SureOne[™] your high quality solution.

Fisherbrand[™] Elite[™] Pipettes

Achieve the best results in your lab with exceptional ergonomics while excelling at accuracy and precision. This comprehensive product line offers a wide range of pipettes for multiple applications providing an optimal fit with the SureOne pipet tips.

Fisherbrand® Elite Pipette and SureOne™ Pipet Tips

➤ **New!**

SureOne Filter Tip Reload System

Introducing the Fisherbrand Filter Tip Reload System that offers the same benefits as the SureOne pipet tips and is the only stackable filter reload system, providing an environmental solution without compromising sterility. With offset wells allowing the filter tips to stack, this advanced system reduces waste and saves bench top and storage space.

- 1 Offset wells allow filter tips to nest and stack.
- 2 Rigid inserts are multichannel format offering a robust non-pliable design providing secure tip seal.
- 3 Lot numbered inserts for traceability also include easy to read filter tip volume and Fisher Cat. No.
- 4 Sterile packaging with outer sleeve protects tips from exterior contamination while refilling inserts.
- 5 Environmentally-friendly filter tip packaging option reduces plastic waste and saves bench top space.
- 6 Blister sleeve guide rails align tip inserts for smooth transfer into the rack.

SureOne Rack

- 1 Flush fit inserts sit flush with rack, allowing easy multichannel pipetting.
- 2 Recycle logo molded into all rack components, allows recycling companies to properly recycle the plastic.
- 3 Notched clasp designed to prop lid open for autoclave venting.
- 4 Sure stack lid rim prevents racks from sliding around when stacked and carted around a lab.
- 5 Safe lock latch allows for one-handed opening and closing ability and won't pop open when dropped.
- 6 Sure snap design securely holds insert in place, preventing it from being lifted out while pipetting.
- 7 Flip-lid can be either a hinged or lift-off lid; hinged format does not prevent use of a multichannel pipet.

SureOne Reload Packaging

- 1 Product information displayed on box.
- 2 Dust flap prevents debris from contaminating the product.
- 3 Finger knockouts allow easy access to slide out product.
- 4 Canyon cut package allows for easy tip insert removal.

SureOne Standard Sterility Claims Non-sterile products are certified to be free of RNase, DNase, DNA and Pyrogen. E-beam sterile products are certified to be free of RNase, DNase, Pyrogen, Bioburden, PCR Inhibitors, Endotoxin and DNA.

To order a SureOne Standards Certificate, contact Fisher Scientific Customer Service with the Cat. No. and Lot No.

Fisherbrand® Elite Pipettes

The Fisherbrand™ Elite™ pipette has a new, improved ergonomic design providing index finger and hand support for maximum comfort. The low plunger force combined with a larger soft-touch ejection tip helps you work longer without fatigue.

Ensuring the success of the application where sterile products are required, the entire pipette can be steam autoclaved. The Elite pipette's double action pipetting button's rotating upper disc prevents accidental volume alteration during pipetting. An extremely large display provides better visibility of the selected volume. This comprehensive product line offers a wide volume range for multiple pipetting applications and excels in accuracy and precision.

- Soft-touch tip ejector
- Optimal fit to SureOne pipet tips
- Fully autoclavable
- Comfortable, lightweight handle with finger rest
- Extremely low plunger forces

Fisherbrand® SureOne Pipet Tips

SureOne Filter Tip Reloading Steps

Step 1 While grasping below the lowest insert, lift sleeve up off rack and transfer entire sleeve to an empty rack. Make sure to align sleeve knockouts with latch and rear lid posts.

Step 2 Push down with even pressure on the middle of the top insert, which will slide bottom insert into empty tray. Plastic sleeve is not intended to rest on any counter top without a rack underneath it.
